

Streaming Tidal or Qobuz on ATOLL devices With *mconnect* app

It is possible to stream directly music from Tidal or Qobuz on Atoll's devices using *mconnect*. (products concerned : MS100, ST100-200, SDA100-200).

To do so, with your smartphone or tab., you have to download *mconnect* app available on Google Playstore or Apple Store (free version limits access and parameters. *Complete version is available for few €*)

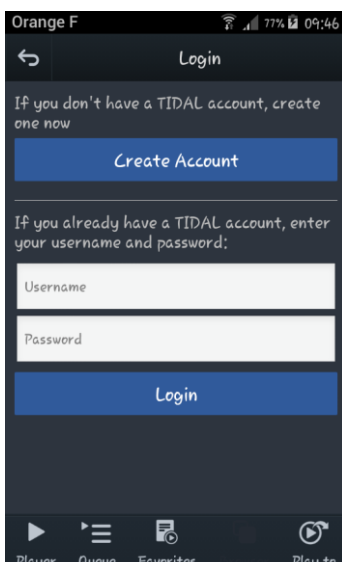

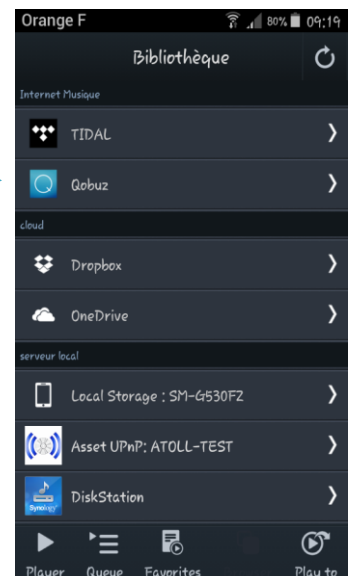

The app allows to read all the music inside your device, in the network, on your cloud or on streaming platforms Qobuz or Tidal.

Once the app opened, select the device where to play the music with *Play to* (here Atoll streamer).

Browser section allows to find access to Qobuz or Tidal.

You can select also the « cloud » section or select the music in the « local renderer» (can be your device or storage on your network).

Your streaming service will be available just after login your personal id (needed just on the first connection).

While streaming or reading your files, features are available such as create playlists, repeat, favorites...
