

HIGH RES AUDIO

The fascination of 24-bit Studio Masters

Music lovers, fans of great sound and audiophiles are searching for the perfect sound experience, for a sound as authentic and realistic as possible – the sound as it was recorded in the studio. Such quality is now available for everybody as downloadable Studio Masters. **With a depth of 24 bits and a sample rate of 96 kHz or even higher.**

The case for these high-resolution music files (Studio Masters) is so convincing that practically all music labels provide relevant recordings in Studio Master quality. These Studio Masters are available at www.highresaudio.com

Sound beyond the ordinary

24-bit Studio Masters music files are the ideal medium to get the maximum possible performance out of your high-end hi-fi system.

24-bit Studio Masters by HIGHRESAUDIO bring **more dynamics, more transparency, more subtle nuances and details**, and they create an acoustic experience that enables you to rediscover even well-known music in a completely new way.

No matter if you listen using headphones or through your loudspeakers, the 24-bit Studio Masters by HIGHRESAUDIO will surprise you all over again and you will experience and enjoy your music more than ever before.

Guarantor of quality

Choosing and delivering high-quality music data in pristine quality requires decades of experience, in-depth musical understanding and the skilful use of world-class audio technology. Our HRA crew consists of sound engineers with exactly this kind of understanding. They are masters of their craft.

Made for the music connoisseur

Experience a sensational, pristine, vinyl-like and warm sound reproduction. Feel your music like you've never done before. We offer you an extensive portfolio: **for classical, jazz and mainstream listeners**. Our goal? To provide a world-class service with our expertise, know-how, creativity and dedication.

Cooperation with the best of their guild in the hi-fi branch

For the playback of high-definition music, we have integrated our download and streaming services into audio devices. The advantage? You can conveniently download and stream music data without the use of an external computer.

The following audio device manufacturers support this feature: Burmester, NAD, Bluesound, MOON Audio, ARCAM, Mark Levinson, AURALIC, Cocktail Audio, Phonosophy, x-odos, HiFi Academy and many more. Check it out – it's truly a great experience!
